CERTIFICATE

This is to certify that no corrections/suggestions were pointed out by the Indian/Foreign Examiners in the Thesis entitled **“Prediction of Diabetic Retinal Disease and Glaucoma Among Diabetic Community Using Soft Computing Techniques”** submitted by **Ms. M. Shanmuga Eswari, (Reg. No. 201906133).**

Dr. S. BALAMURALI,
SUPERVISOR,
Senior Professor,
Department of Computer Applications,
Kalasalingam Academy of Research and
Education,

Place : Krishnankoil
Date : 14.03.2025

Krishnankoil 626 126
TN, India.

Minutes of the Ph.D. Viva-Voce Examination of Ms. M. Shanmuga Eswari, (Reg. No. 201906133) held on 21st April, 2025 at 11.00 a.m. in Seminar Hall, R & D Office, Kalasalingam Academy of Research and Education.

The Ph. D. Viva-Voce Examination of **Ms. M. Shanmuga Eswari, (Reg. No. 201906133)** on her Ph.D. thesis entitled **“Prediction of Diabetic Retinal Disease and Glaucoma Among Diabetic Community Using Soft Computing Techniques”** was conducted on **21st April, 2025 at 11.00 a.m** in Seminar Hall, R&D Office, Kalasalingam Academy of Research and Education, Anand Nagar, Krishnankoil.

The following members of the Oral Examination Board were present:

1.	Dr. S. Balamurali Senior Professor Department of Computer Applications Kalasalingam Academy of Research and Education Krishnankoil – 626 126.	Supervisor & Convener
3.	Dr. M. Nandhini Professor of Computer Science School of Engineering and Technology Pondicherry University Puducherry – 605014.	Indian Examiner
4.	Dr. K. Balasubramanian Professor and Head Department of Computer Applications Kalasalingam Academy of Research and Education Krishnankoil – 626 126.	DRC Chairman

The research scholar presented the salient features of her Ph.D. work, followed by an interactive session with the board members. During this session, she addressed questions and clarifications raised by both the Indian and Foreign Examiners. The scholar provided comprehensive responses, satisfactorily addressing all queries posed by the board members.

Based on the quality of the scholar's research work, the effectiveness of her presentation, and her satisfactory responses to the examiners' questions, the board unanimously recommends the award of the Ph.D. degree in Computer Applications to Ms. M. Shanmuga Eswari.

Dr. S. Balamurali
(Supervisor & Convener)

Dr. M. Nandhini
(Indian Examiner)

Dr. K. Balasubramanian
(DRC Chairman)

KALASALINGAM ACADEMY OF RESEARCH AND EDUCATION

ANAND NAGAR, KRISHNANKOIL – 626 126

DECLARATION

I do hereby declare that the thesis entitled “**PREDICTION OF DIABETIC RETINAL DISEASE AND GLAUCOMA AMONG DIABETIC COMMUNITY USING SOFT COMPUTING TECHNIQUES**” submitted by me for the Degree of Doctoral in Philosophy in Department of Computer Applications is the result of my original and independent research work carried out under the guidance of **Dr. S. BALAMURALI**, Senior Professor, Department of Computer Applications, Kalasalingam Academy of Research and Education and it has not been submitted for the award of any Degree, Diploma, Associateship, Fellowship of any Universities or Institutions.

Signature of the Candidate

M. SHANMUGA ESWARI

KALASALINGAM ACADEMY OF RESEARCH AND EDUCATION
(Deemed to be University)
ANAND NAGAR, KRISHNANKOIL – 626 126

BONAFIDE CERTIFICATE

It is certified that this doctoral thesis titled “**PREDICTION OF DIABETIC RETINAL DISEASE AND GLAUCOMA AMONG DIABETIC COMMUNITY USING SOFT COMPUTING TECHNIQUES**” is the bonafide work of **Mrs. M. SHANMUGA ESWARI** who carried out the research work under my supervision. It is also certified that to the best of my knowledge the work reported herein does not form a part of any other thesis or dissertation on the basis of which a degree or award was conferred on an earlier occasion on this or any other scholar.

Dr. S. BALAMURALI

SUPERVISOR,

Senior Professor,
Department of Computer
Applications,
Kalasalingam Academy of
Research and Education.

ABSTRACT

Diabetic retinal diseases, including diabetic retinopathy and glaucoma, are irreversible causes of blindness, demanding early detection to mitigate vision loss. This study proposes a novel soft computing-based framework for the prediction of diabetic retinal diseases and glaucoma within diabetic populations, leveraging advanced computational techniques to enhance diagnostic accuracy.

This work introduces a multi-model architecture integrating four innovative soft computing approaches. Firstly, a Random Search Optimization Adaboost Ensemble classifier is designed for diabetic retinal disease and glaucoma prediction, combining adaptive boosting with hyperparameter optimization to address dataset imbalance and improve generalization. Secondly, a Deep Neural Classification Network is developed for diabetic retinal disease detection, employing Region of Interest guided segmentation and Neural Image Optimization, followed by Grey Level Co-occurrence Matrix feature extraction to reduce dimensionality and enhance lesion discrimination. Next, an Artificial Algae Algorithm with Support Vector Machine hybrid model is proposed for glaucoma diagnosis, integrating bio-inspired optimization for feature selection with kernel-based classification to improve boundary delineation in fundus images. Finally, an Interpretable Hybrid Stacking Ensemble Classifier leverages Explainable Artificial Intelligence principles to detect glaucoma in diabetic patients, combining Grey Co-occurrence Matrix and Grey Level Run Length Matrix textural features with meta-learning for transparent decision-making.

The framework is validated using retinal datasets, processed through multilevel preprocessing (noise removal, homomorphic filtering, color normalization) and segmented via Terausnet and Faster Region-based Convolutional Neural Networks for structural feature extraction. Experimental results demonstrate that the proposed models outperform conventional methods, achieving superior precision 94.3%, recall 92.8%, F1 score 93.5%, and classification accuracy 96.1% with minimized error rates 3.2%. The Random Search Optimization Adaboost Ensemble and Explainable Artificial Intelligence Hybrid Stacking Ensemble Classification models exhibit exceptional interpretability, addressing the "black-box" limitation of deep learning, while the Artificial Algae Algorithm Support Vector

Machine and Deep Neural Classification Network optimize computational efficiency and specificity.

This study highlights the transformative potential of soft computing techniques ensemble learning, deep feature engineering, bio-inspired optimization, and explainable artificial intelligence in advancing early diagnosis of diabetic eye diseases. By harmonizing accuracy, interpretability, and clinical relevance, the proposed framework offers a scalable solution for reducing preventable blindness in diabetic communities, aligning with global healthcare priorities. This research underscores the transformative role of artificial intelligence in advancing health justice, ensuring that diabetic communities regardless of geography or socioeconomic status can access timely, life changing interventions

ACKNOWLEDGEMENTS

I would like to express my sincere salutations to **Shri. K. Sridharan.**, Chancellor and **Dr. S. Shasi Anand.**, Vice President, Kalasalingam Academy of Research and Education for equipping me with all necessary amenities to do my research work. I express my sincere gratitude to **Dr. S. Narayanan.**, Vice-Chancellor and **Dr. V. Vasudevan.**, Registrar, for permitting me to do my research work under the Department of Computer Applications.

I would like to express my sincere gratitude to my research supervisor, **Dr. S. Balamurali.**, Senior Professor, Department of Computer Applications, for his continuous support of my Ph. D., study and related research, for his patience, motivation, and immense knowledge. His guidance helped me throughout my research and the writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph. D. study.

I sincerely thank **Dr. P. Deepalakshmi.**, Dean of School of Computing, and **Dr. K. Balasubramanian.**, Chairman of Department Research Committee and Head of the Department, for their constant encouragement and insightful suggestions. I also acknowledge **Dr. M. Arun.**, for his valuable support.

Last but not least, I would like to thank my family, my friends and almighty God for granting me the wisdom, health and strength to undertake this research task and enabling me to its completion.

M. SHANMUGA ESWARI
